

Veefil TRI93-50-01 Charger Error code list

Error Code	Description	Related function	On-site visit required to restore functionality	The problem can be corrected remotely	The user can clear the error on-site	Charging capability is not affected
0	No errors are present	General				
1	12 volt power supply error	General			•	
2	Internal 3 phase power connection problem.	General		•		
3	Internal 3 phase power connection problem.	General		•		
4	Internal 3 phase power connection problem.	General		•		
5	Problem initialising CAN communications with the vehicle.	CHAdeMO			•	
6	Vehicle has sent an incorrect request to the charger.	CHAdeMO			•	
7	Vehicle has sent an incorrect request to the charger.	CHAdeMO			•	
8	Vehicle has a problem with its battery connection.	CHAdeMO			•	
9	Connection to vehicle check failed.	CHAdeMO		•		
10	Problem locking the connector with the vehicle.	CHAdeMO			•	
11	Vehicle has a problem with its battery connection.	CHAdeMO			•	
12	Problem initialising DC output.	General		•		
13	Vehicle is not communicating correctly.	CHAdeMO			•	
14	Emergency stop button has been pressed.	General	•			
15	Error notification from the vehicle.	CHAdeMO			•	
16	Fault detected on the DC output.	General		•		
17	Internal electronics fault	General			•	
18	Reserved.					
19	Charger has disconnected from vehicle.	CHAdeMO			•	
20	Vehicle has sent an incorrect request to the charger.	CHAdeMO			•	
21	Communications with the vehicle have dropped out.	CHAdeMO			•	
22	Vehicle failing to respond.	CHAdeMO			•	
23	Reserved.	General
